

Overtone hypothesis starts after its root

PROCESS-BLINDED RESTART AFTER INVESTIGATOR PLP EXPOSURE

Identity/activity hypotheses only · episode starts are not validated attacks

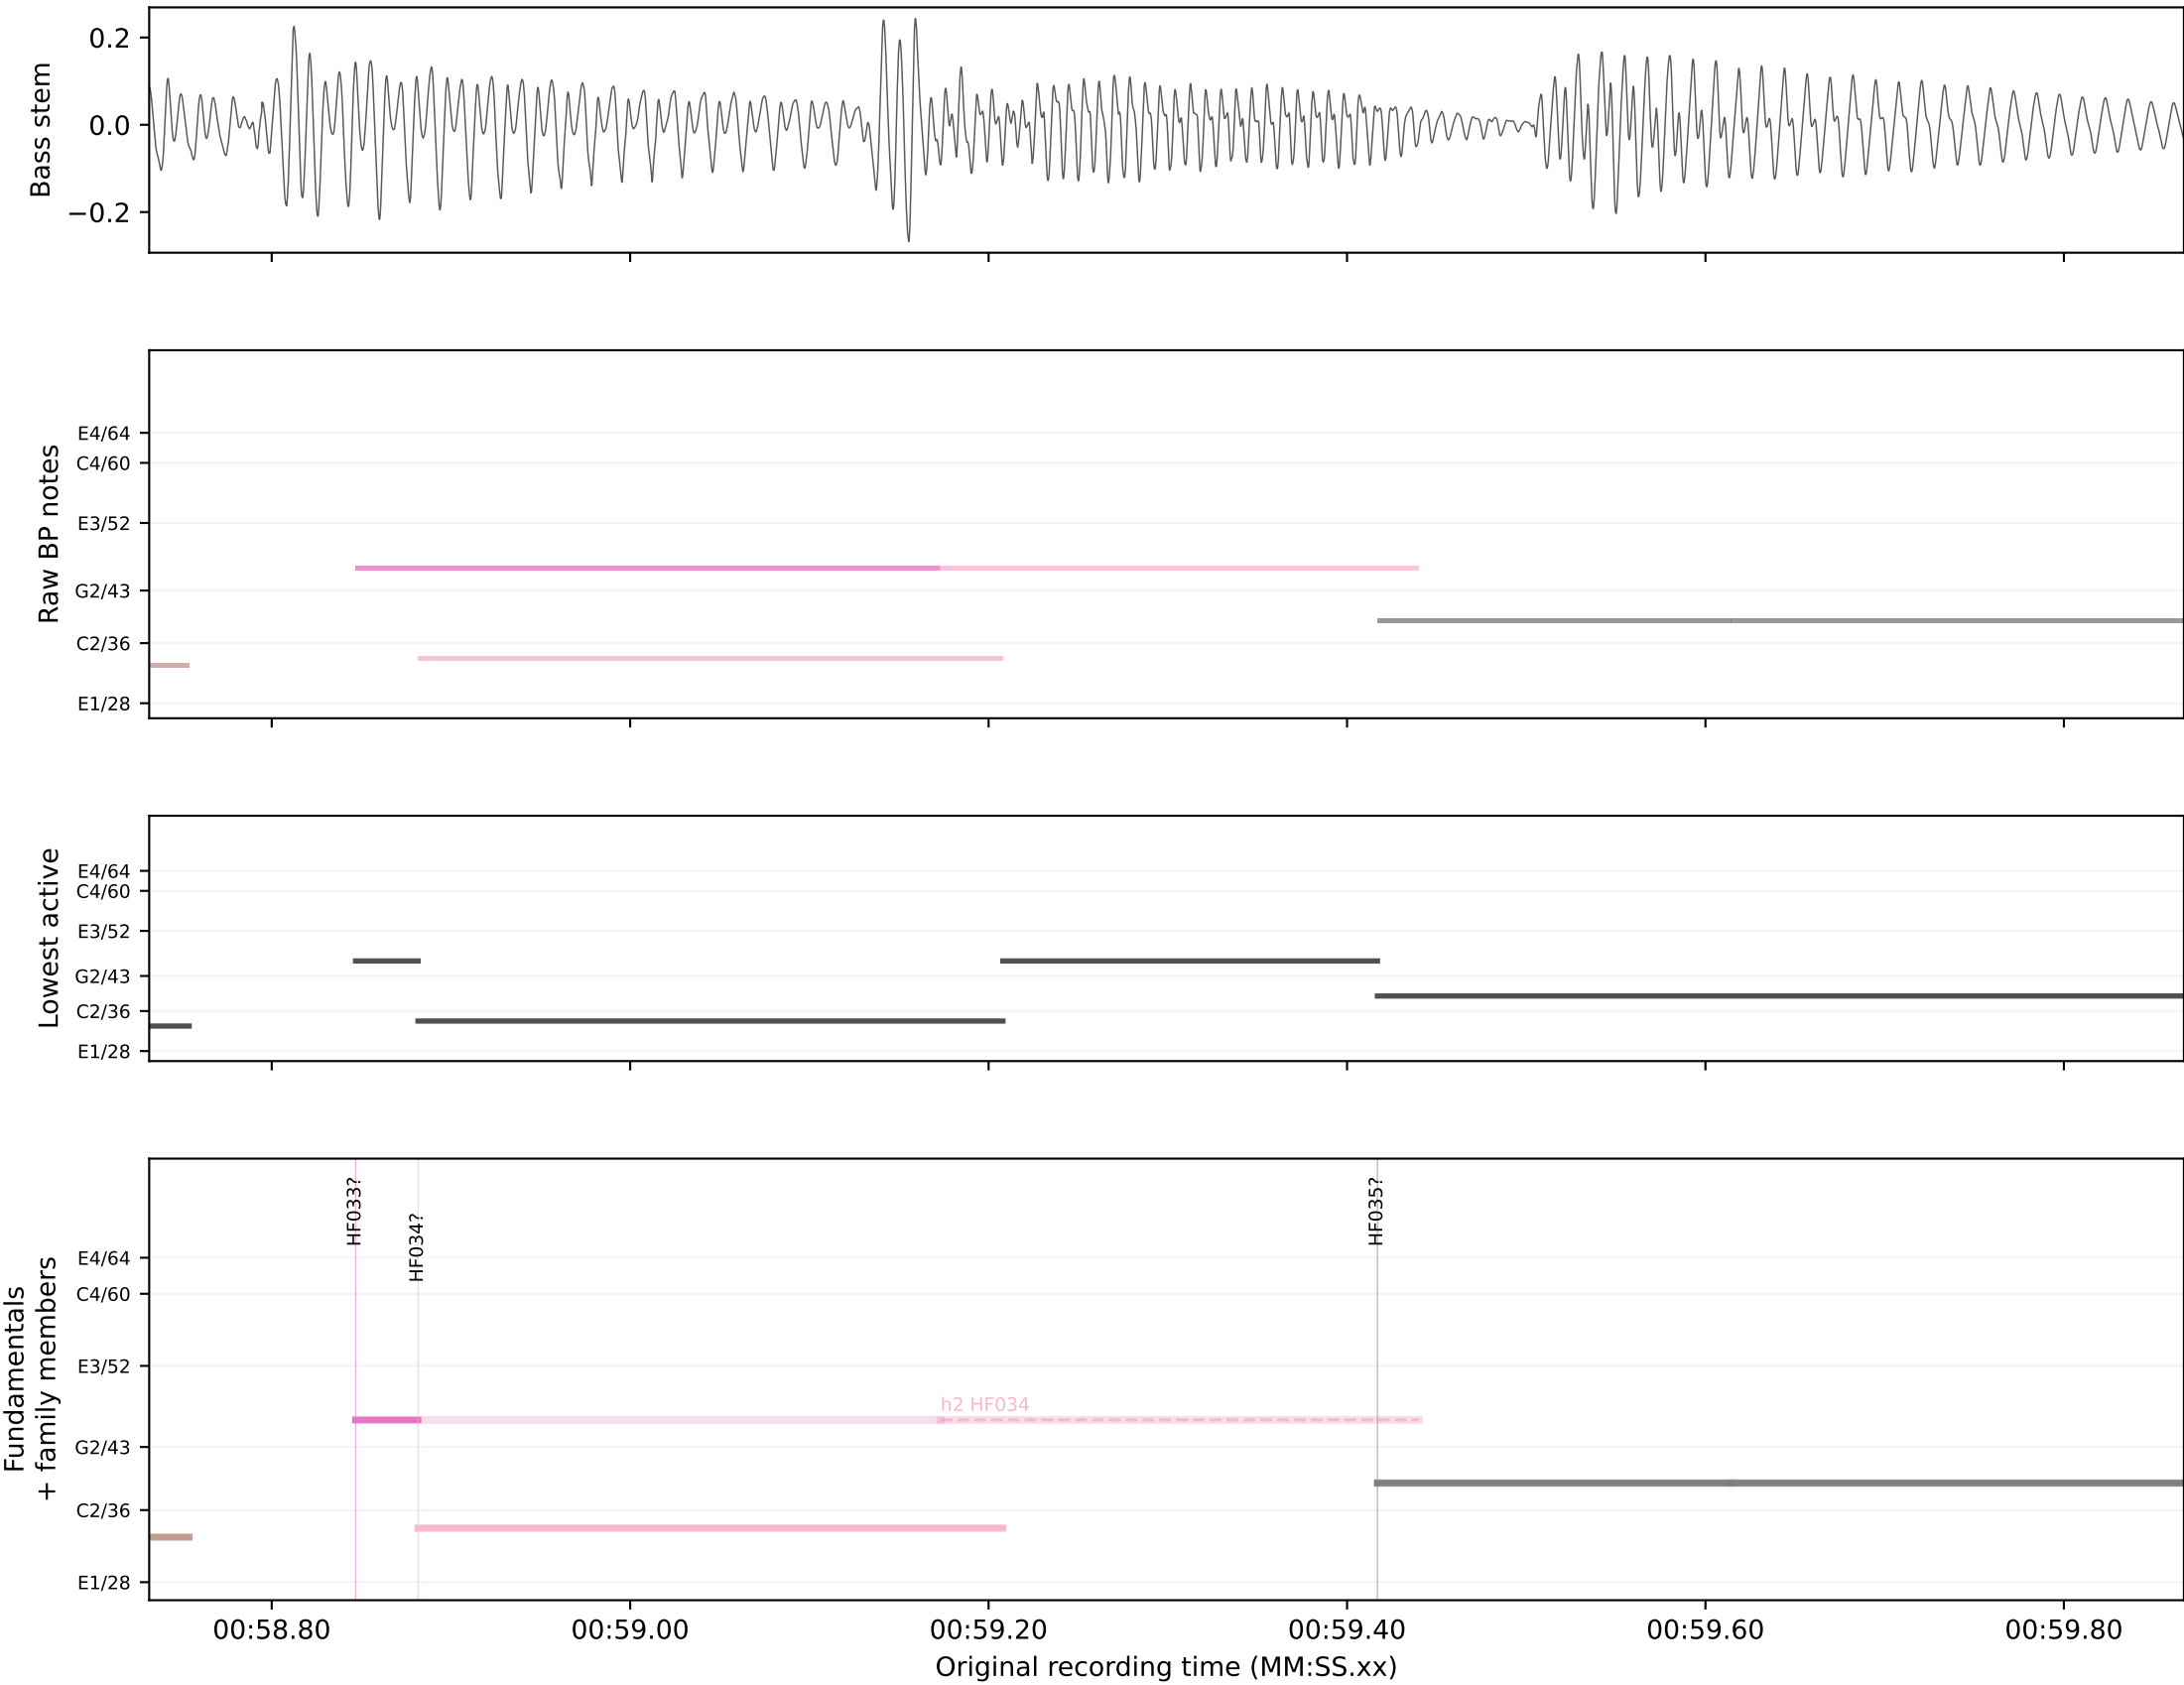

Solid: current fundamental hypothesis · faint solid: native root tails/fragments · dashed: harmonic hypothesis
Thick translucent dashed line: lingering harmonic · ? ambiguous family/fragment/overlap · color tracks family ownership
No note timestamps moved; current-line truncation is a display convention. Original native durations remain in raw/faint layers.

New lower root under a lingering prior-family harmonic
