

Frozen logistic C=0.1 — correlated feature weights are associations, not causal effects  
Class-balanced scores are not calibrated physical-attack probabilities

GAL09\_20260914\_S3\_E\_F\_R08 · E / f  
CORRECT\_PITCH\_MATCH · ATTACK\_SELECTED · error -5.342403628119996 ms  
Green: GT/interval · orange: native BP · blue dotted: frozen per-BP selection  
For ambiguous BP correspondence, per-hypothesis decisions remain hypotheses, not GT matches.

Raw-query abstention example: T04\_N001  
No GT event association asserted. No wrong selected candidate >20ms among 35 resolved holdout notes.
